

# AssureERP for Microsoft Dynamics 365

## AI-powered testing speeds up and secures Dynamics 365 rollouts

### The business dilemma

Transitioning to or upgrading Microsoft Dynamics 365 is a strategic business move. **The catch?** Your key users are distracted from their essential duties to test a solution that often isn't fully prepared to receive constructive feedback.

#### What this looks like in practice:

- Business SMEs lose valuable time to manual testing tasks
- Users test unfamiliar processes outside their daily responsibilities
- Testing is squeezed into tight timelines, often too late to act
- Stakeholders experience fatigue, frustration, and disengagement
- Tests don't reflect how the system is actually used in real life

**The result?** Defects go live, users push back, and projects run over time and budget – undermining trust in the solution. Without a smarter approach, you risk missing the real value of your Dynamics 365 investment.

### Our AssureERP approach

#### Free your experts. Improve your testing outcomes.

Beyond speed and cost savings, AssureERP delivers deeper value across your Dynamics 365 programme. These added benefits strengthen adoption, security, and overall system reliability.

- Up to **80% reduction** in testing and QA workload for business users
- More than **80%** critical business processes covered
- Up to **50%** reduction in total UAT costs
- **50% faster testing times** from UAT to go live
- Built-in security and compliance reduce audit and data risks
- Real-world testing drives higher user adoption at go-live
- End-to-end integration checks prevent post-launch issues

### Real success stories

When a UK financial services provider faced a major business system migration, they couldn't afford disruption. Our approach delivered:

***2i's approach ensured test cases reflected our real processes. My HR team could focus on organisational change and worry less about technology change!***

Head of HR, Enterprise Client

2i is the UK's leading quality assurance and software testing consultancy, delivering excellence since 2005.
